## CONSTRUX

Mini PEEK and PTC Spacer System

(1)ORTHOFIX

## CONSTRUX <br> MINI PEEK SPACER SYSTEM

## Simple yet comprehensive, reliable and amazingly versatile

CONSTRUX Mini offers implant options with heights ranging from 5 mm to 14 mm as a cervical interbody or partial vertebrectomy solution. Its large graft window promotes fusion potential while its two footprint designs and lordotic angles cater to a broad range of patient anatomy. Aggressive anti-migration ribs grip the endplates and four titanium markers enhance intraoperative visibility.

## Competitive Design Advantages

- Radiolucent implant with titanium markers for intraoperative visibility
- Anti-migration ribs for secure placement
- Large center opening for packing bone grafting material
- Multiple implant options enable various surgical solutions
- Straightforward instrumentation for easy implantation

## CONSTRUX Mini PTC <br> PEEK TITANIUM COMPOSITE SPACER SYSTEM

## Combines the Advantages of PEEK and Titanium

The CONSTRUX ${ }^{\circledR}$ Mini PTC Spacer System has been designed to optimize Anterior Cervical Procedures with a proprietary technology that combines PEEK and titanium into a porous interbody solution for the cervical spine. This PEEK/Titanium hybrid is designed with an optimal porosity and pore size to create a 3D porous structure that allows the patient bone to grow into the porous titanium endplates. The implant also features a PEEK core with porous titanium endplates which allows for post and intraoperative imaging without image distortion compared to metal designs currently on the market. The CONSTRUX Mini PTC Spacer System offers three footprints to address the cervical interbody fusion solution. The implants are available in both parallel and lordotic angles with heights of $6 \mathrm{~mm}-12 \mathrm{~mm}$ in one-millimeter increments.

## Competitive Design Advantages

- Porous titanium endplates allow bone to grow within
- PEEK core to obtain imaging properties while assessing fusion
- Large center opening for packing bone grafting material
- Multiple implant options to enable various surgical solutions
- Straightforward instrumentation for easy implantation
